Chris and others,
I made a call to the Texas Dept. of Ag Pesticide Section and discussed the incident that took place in Amarillo, TX with Perry Cervantes. Perry informed me that the contact would be Steven Boston (Assist. Regional Director-Lead Inspector) out of Lubbock, TX. He also informed me that Camilo Gavzon (Inspector) was assigned the case. Perry will be sending additional information. I will forward to all once I receive.
Steven Boston's phone number is: 806-799-8555 (O) or 806-559-7509 (M)
Camilo Gavzon's phone number is: 806-237-8420

Steve and Craig-

As a heads up, we are currently responding to an incident that appears to be a residential exposure to a restricted use pesticide. Can you assist in identifying a Texas Department of Ag contact that we may coordinate with? Also, the exposure was was to phosphine gas not phosgene as mentioned in the report below. Jhana is our OSC on scene.

Subject: Amarillo, TX residential phosgene gas incident - OSC Enders and START contractor deployed

4 people are dead and up to an additional 6 people have been exposed to what is believed to have been phosgene gas. Reports indicate that a resident mixed aluminum phosphide with water which produced phosgene gas. TCEQ notified EPA of the incident and has requested assistance. The incident is located in Amarillo, TX. EPA has dispatched OSC Enders and START contractor.
